

Automate a household task!

Set your bills to autopay

Try out ordering your groceries online for pickup or delivery. (sometimes it's even free!)

Meal plan or meal prep: with a small time investment, your dinners will be automated the rest of the week!

Put household staples on auto-reorder, like TP, diapers, soap, furnace and water filters, batteries, etc

Start saving up to treat yourself to a gadget that'll work for you: a robot vacuum or lawnmower, self-cleaning kitty litter box, etc.

Has your dishwasher been broken for ages? Stop procrastinating and finally call the repair company!
