**Overall Comments**

Use this comments section to provide any special instructions or notes about this recruitment, such as time & labor codes, multi-level recruitment, posting deviations greater than 10 business days, etc. The comments will be recorded as part of the permanent history of this requisition.

**Comment**

- Please post for 15 business days
- Please post at TOT IR

---

1. The Salary Details are now populated from the Job Code. Validate that these are correct and as expected.

2. Enter the Officer Code of the position from the drop down list. If bargaining unit information should be added to the posting description, please make a note in the comments box at the bottom of the requisition page.

3. Validate that the correct parties are entered in the requisition. In this example, the hiring manager submitted the requisition without adding the Appointing Authority (or designee). Entering the Appointing Authority in the "Involved Parties" creates an email notifying that person that a requisition has been submitted. No action will need to be taken by the Appointing Authority. To obtain approval by the Appointing Authority or designee via the system, use the Add Approver button at the bottom of the requisition screen. (See Next Page – “Add Approver”)
NOTE:
This step will add the Approver as a “hard stop” in the Route Map. Use of this step is optional based on the Department's business process.
There are 2 options within the system for requesting Time and Labor data from the department’s Business Office:

a) Add a Business Office representative to the Involved Parties. When you send the requisition to the next step, the system will trigger an email to that employee. The email includes details from the requisition and requests that the Time and Labor date be provided to you in 5 business days.

The system sends this email when Talent Acquisition approves the requisition.

b) If you don’t want to trigger the system generated email, don’t put anything into the Business Office box. You can still use the system to select the staff member and send your own email. Click in the Search box at the top of the page and enter the name of the person that you want to send your data request to. Hover over the name that appears, and a box will pop up with the person’s name, title, and email address. Click on the email address and a blank email will open in a new window. Take a snap of the position details and paste into your email.

Add any comments as needed.

Click on the Send to Next Step button.

Add Time and Labor Data to the “Overall Comments” found toward the bottom of the Job Requisition Details prior to hiring a candidate to that requisition.
APPROVING A REQUISITION

Optional: Enter any comments that you want to include in the notification email that will go to the Approver at the next step (whether the Appointing Authority/Delegate or Talent Acquisition).

Then click on the Send to Next Step Button.

The requisition is now pending approval at the next step in the Route Map.

HIRE PROCESS

29. Initiating the Hire Process
31. Moving to “Hired” Status and Closing out Requisition

Table of Contents
Initiating the Hire Process

1. From the Home menu drop down, click on the Recruiting link.
2. To quickly find the requisition, click on "Filter Options."
3. A dialogue box will open. Enter the Job Requisition ID and click on Update Screen.
4. On the requisition list, click on the number in the Candidates column.
5. Select the candidate in Offer Status, by clicking on the person’s name.

Initiate the Hire Process upon receipt of system notification (email) that the candidate has accepted the offer.
You are now viewing the candidate’s application. You may enter notes for HRIS in the Hiring Notes box. (for example: “Double fill approved xx/xx/xx by xx” OR “This is an internal xfr; actual start date is the beginning of the pp”)

The details in the offer will be forwarded to HRIS by a data feed. You may review the offer letter by clicking on the link. It will open in a new window or download, depending on your web browser. To validate or overwrite the start date, enter the correct date in the “Hired Date” field.

Delete the dashes from the SSN or we will get an error in the file transfer to HRIS.

Accuracy Alert
If you identify any errors (other than a change in start date) in the Offer, stop here. Once the discrepancies have been addressed, submit a new offer to the candidate and resume the hire process when the corrected offer has been accepted.

If your data is rejected in the data feed, you will receive a notification and be required to resubmit the Hire (after Talent Acquisition reopen the requisition). Errors that cannot be corrected this way will require a PAR.
NOTE:
If there was just one opening remaining on the requisition, the status of the requisition will change to filled and candidates who were not previously dispositioned to "Not Selected" will receive a system generated email.
Exempt positions are a little different from Classified positions in that all of the required information under Salary Details may not populate when Field HR chooses an exempt job code when approving the Job Requisition. The Pay Grade field under Salary Details may not populate for all exempt positions. In these instances, manually enter the numeric pay grade; do not write “Exempt.”

If pay grade cannot be determined at the time the requisition is created, Field HR will need to ask their TA Specialist to update this field with the appropriate numeric value prior to moving a candidate into “Hired” status. A blank field or inaccurate value will cause a feed rejection. If this happens, TA will need to re-open the requisition to update the field, and the new hire will need to be pushed through the feed a second time.

Pay Plan, Step, Hourly Rate, and MFA should self populate for exempt job codes. If they do not, you can enter “OTH,” “0,” “0” and “0” respectively to complete those fields.

If any fields aside from “Officer Code” are left blank, a feed rejection will occur when a candidate is hired. Ensure that these fields display the correct values prior to moving a candidate into “Hired” status. If any fields are blank, please notify your TA Specialist so they can enter the values.
